## SUMMARY

A Sociable, responsible, and quick-learning BSIT student driven to contribute in the team. I am committed to delivering solutions, adaptable and eager to gain my first professional work

## PROJECTS & IT EXPERIENCE

### Capstone Project: Interactive Learning Application for Early Learners

- Developed a gamified mobile learning application with emotional design elements (badges, leaderboards, animations) as well as apply proven teaching methodologies.
- Implemented role-based access for Admin, Teacher/Parent, and Learners.
- Tech Stack: React Native, Expo Go, Firebase, Lottie
- Role: Project Manager & Full-Stack Developer (research, coordination, frontend, backend, database design)

### PRIS – Population Registration Information System for Barangay Pitogo

- Built a population management system to optimize census and resident data registration.
- Improved data organization and administrative efficiency.
- Role: Full-Stack Developer (frontend, backend, database design, repository management)

### Academic Projects

- Developed multiple academic systems including a Blog Platform, Event Registration & QR Ticket Scanner, and Mini E-Commerce System.
- Focused on practical familiarization with full-stack concepts.
- Gained exposure to RESTful APIs, MVC architecture, and database integration.
- Technologies: REST APIs, MongoDB, MySQL, SQLite, Swagger, Postman

## SKILLS

- **Development & Programming:** React, React Native, Python, HTML, CSS, JavaScript, TypeScript
- **Databases & Backend Tools:** Firebase, MongoDB, XAMPP, REST APIs, GitHub (version control)
- **UI/UX & Design Tools:** Figma, basic digital and multimedia tools(Office Tools, Adobe Tools)
- **Troubleshooting & Technical Support:** Hardware and software issue diagnosis, OS installation and recovery, driver installation, basic system optimization and maintenance
- **Professional Skills:** Strong communication and people skills, quick learner with high attention to detail, adaptable in team-based environments
